

Final Chance to Join the 2nd China Commercial Vehicle Congress 2016!

According to statistical analysis of China Association of Automobile, the current commercial vehicle industry is now adapting to the “new normal”. To accelerate structural adjustment and transformation of upgrading critical period, the Chinese government has put great emphasis on innovation and development of the new era of the automobile industry. With the release of “**China Manufacturing Strategy 2025**”, it showed the increasingly support towards intelligent automobile, energy-saving and new energy vehicles. Many areas of the automobile industry will be ushered in an excellent opportunity.

In view of this, the **2nd China Commercial Vehicle Congress 2016, Oct. 20th-21st, 2016, Renaissance Shanghai Pudong Hotel, China** will be featured as “Transformation and Innovation -- Creating Strategic Value”, inviting 400+ the major players from government agencies, trade associations, OEMs, auto-parts companies, logistic companies, distributors, battery industry leaders, and etc. from the industry. It will provide a comprehensive platform for the industry counterparts.

#### **Highlights:**

Market outlook and current policy trends

The interpretation of national VI emission standard for commercial vehicles

Technology innovation and development trend

Aftermarket model innovation

The opportunities and challenges for brand commercial vehicle auto-parts in the aftermarket
